80% cheaper

to run than reverse cycle air conditioning²

Evaporative Air Conditioning

Breeze

Harness the *Power* of nature

At Seeley, we harness the power of wind and water.

There's a natural attraction between air and water that is powerful...

Outside, these forces of nature live all around us. But, what if we could harness this power inside too?

Our evaporative air conditioning technology has been inspired by nature with beautiful design, incredible reliability and unsurpassed cooling performance using 100% fresh outside air - the only air you want to breathe!

Today, you can harness that power too.

Seeley International is renowned for world-class design and innovation, striking that delicate balance between form and function, just like nature.

We have a range of evaporative coolers that would seamlessly integrate with all roof lines without compromising on comfort, quality or environmental credentials, through to our traditional range that also deliver efficient, natural cooling for long lasting comfort.

Since day one, nearly 50 years ago, our company has been about challenging mindsets and stretching the imagination. Trust, reliability and innovation have been the cornerstones to success. It's no coincidence that Seeley International is the most awarded air conditioning manufacturer in Australia. We export our amazing products all around the globe.

At Seeley International, we don't settle for ordinary, and neither should you.

Founder and Executive Chairman

Australian designed, made and owned

Built by Australians, for an Australian climate.

Seeley International is proudly a 100% Australian owned company, designing and manufacturing world-leading air conditioning products for Australia and the world. As Australia's largest air conditioning manufacturer, we are a global leader in developing ingenious, energy-efficient cooling and heating products. Being made in Australia, you can rely on build quality, availability of parts and after sales service. We're extremely passionate, and dedicated to strengthening the Australian economy, supporting local employment and building on the skills of our workforce.

Why evaporative air conditioning?

The most healthy and energy efficient cooling experience for your home

Evaporative air conditioning delivers a natural, exceptionally healthy cooling experience in the place where people spend **most** of their time - **HOME**. Bringing an **endless supply** of **100%** fresh, cool, filtered outside air into the home, not taking moisture from the air, which **combats** dehydration. It is environmentally friendly as it does not use harmful refrigerants containing HCFC's or HFC's. It produces less CO₂ emissions than reverse cycle air conditioning due to its efficient, low energy use whilst cooling your whole home, and everyone in it. **PLUS evaporative air conditioning** drives everyone's **second-hand air out of the home**, along with the brain-numbing CO₂ which everyone exhales - making this the **HEALTHIEST** air conditioning.

It's kind to you, kind to the environment, kind to your cash-flow, making evaporative cooling the natural choice.

The healthiest choice

Improving the health, wellbeing and vitality of the whole family. Not taking moisture from the air, which combats dehydration.

Quiet to run

Ask your dealer for a demonstration - see how **cool** and whisper quiet it is!

Environmentally friendly

Produces up to 80% less CO₂ emissions⁻ - that's the equivalent of **planting 16 gum trees!**
"Refer to page 7.

Low maintenance

Innovative design, minimising long term servicing.

Lowest running cost in Australia

Up to 80% cheaper to run².

Save up to 80% on energy bills when compared to a reverse cycle air conditioner.

Built to last

Quality that lasts. Up to 7 years comprehensive warranty³.

NATA Testing

NATA accredited laboratory test results substantiate superior product performance claims.

Ultimate lifestyle

Perfect for alfresco living and busy families where children and pets keep coming in and out.

Fresh, cool clean air

Delivers **100% fresh**, filtered outside air, expelling the stale recycled air, and naturally cooling your **whole** home.

Australian designed, made and owned!

Manufactured by family owned Seeley International, Australia's largest air conditioning manufacturer.

Technology that puts you in control

MagIQTouch® Controller technology for complete control of your comfort at home.

Minimal water usage

Evaporative air conditioning uses up to **94% less water** per year than a shower⁴.

2.Seeley International's calculation based on approximate running cost figures from publicly sourced data. Comparison with 1.5 star not zoned ducted refrigerative system in a large size (220m') 2-star pre 2005 house in a Melbourne climate, cooling all day on the weekend and in the mornings and evenings when internal temperatures are high, and an electricity tariff of 31.9c/kWh. Negligible water cost excluded. 3.The 7 year comprehensive warranty is available exclusively (i.e. only) from Seeley International participating dealers. The warranty has terms and conditions, including the requirement for servicing of the product in accordance with the owner's manual. In the fourth year the service must be performed by Seeley International or its appointed nominee. 4.Water use calculations for shower are based on shower water use for 4 people, 7 mins per person per day at 9L/min, over twelve months, calculated at 91,980 L. Water use calculations for Braemar unit LCB450 evaporative air conditioner over twelve months are 5,405 L.

Start enjoying **world-leading** evaporative air conditioning and become... **Healthier**, **Wealthier** and Environmentally **Wiser**!

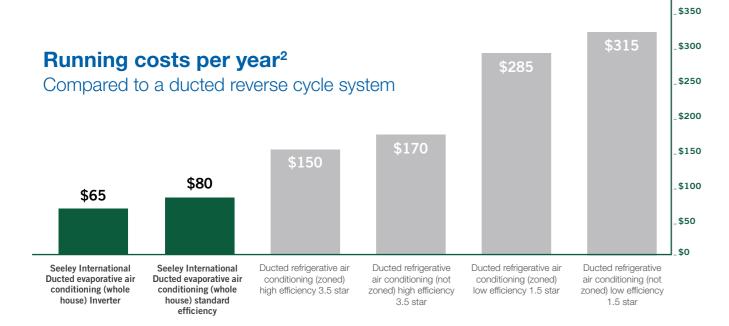

Seeley International and your health

Evaporative air conditioning is better for you. Here's why:

- Evaporative air conditioners **continually cool and deliver 100% fresh, filtered, OUTSIDE AIR,** whereas reverse cycle air conditioners **re-circulate air** that you've **all been breathing and living in** for hours, and maybe days. This re-circulated air contributes to a build-up of CO2 in the home and CO2 is known to have an adverse effect on human health and well-being.
- Evaporative air conditioning naturally moisturises the air so **NO-ONE** suffers from the dryness caused by reverse cycle air conditioning.

Up to 80% cheaper to run

Using highly efficient inverter motors, our evaporative air conditioners deliver savings of up to 80% on your energy bills when compared to ducted reverse cycle systems. That's a **saving of up to \$250 per year!**²

Incorporating InvertaCool® technology • Quieter operation.

- Greater air flow control.
- Ultra-energy efficient, lower carbon emissions.
- Lower power bills.

2. Seeley International's calculation based on approximate running cost figures from publicly sourced data. Comparison with 1.5 star not zoned ducted refrigerative system in a large size (220m²) 2-star pre 2005 house in a Melbourne climate, cooling all day on the weekend and in the mornings and evenings when internal temperatures are high, and an electricity tariff of 31.9c/kWh. Negligible water cost excluded.

Minimal water usage

Our water saving features:

- Superior water distribution system
- Water quality monitoring
- Auto-Clean™ Automatic water drainage

The result: Minimum water usage for maximum, fresh cooling power.

Water consumption comparison across household appliances⁴

9L/min water efficient shower head
4 people daily, taking 7 minute
showers: 91,980 L/year

Garden Watering (including sprinklers)
120 mins per water at 20 litres per
minute - 2x per week and 3x in Summer
months:57,600 L/year

Toilet
35 flushes per week, per person in a
4person household, average 5L per flush:
36,400 L/year

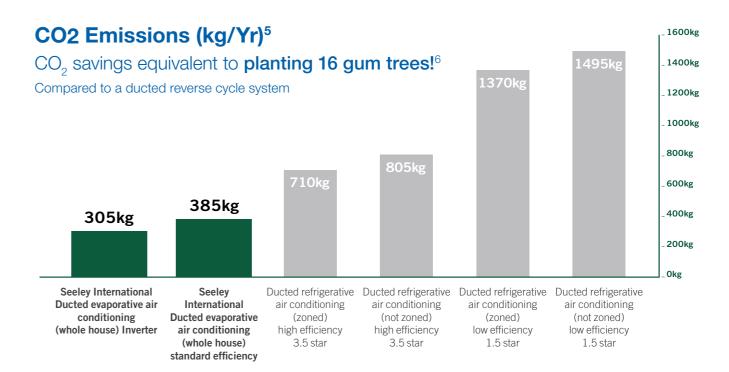

Washing machine
Based on 70L/load, 5 loads
per week: 18,200 L/year

Seeley Evaporative A/C⁴
Based on 12 months usage: 5,405 L/year

Reduce your carbon footprint

The power consumption of just one ducted refrigerated air conditioner can result in up to 1.4 tonnes of harmful CO₂ being pumped into the atmosphere each year. By purchasing a Seeley International evaporative air conditioner, which uses water, a **renewable resource**, to cool, you'll **reduce your impact on the environment** by producing up to 80% less CO₂ emissions⁵, when compared to a ducted reverse cycle air conditioner.

4.Water use calculations for Braemar unit LCB450 evaporative air conditioner over twelve months are 5,405 L. This comparison is based on usage in an average-size Australian home with 4 occupants. 5.Seeley International's calculation based on approximate greenhouse gas emissions figures from publicly sourced data. Comparison with 1.5 star not zoned ducted refrigerative system in a large size (220m²) 2-star pre 2005 house in a Melbourne climate, cooling all day on the weekend and in the mornings and evenings when internal temperatures are high.
6.This is an estimate based on the CO₂ calculation above and using the data from forestlearning.edu.au, 'Carbon and its storage in forest and wood products' article, published 2011.
Calculation based on a spotted gum tree that sequestrates 72kg CO2/YR.

17

Number one in natural cooling!

A showcase of innovation

Australian engineering at it's finest. Breezair is Seeley International's premium, world-leading evaporative air conditioner brand, offering advanced technology and revolutionary design for fixed evaporative whole of home cooling.

The Breezair Evaporative air conditioner was the world's first corrosion-free, all-plastic rooftop cooler to be made, completely revolutionising the market in the early 80's. The move away from corroding metal parts, to durable plastic coolers became, and remains, the industry standard today.

Every element of the Breezair evaporative air conditioning system comes together to ensure that your family will enjoy the benefits of natural and energy efficient cooling.

Recent Breezair Industry Awards:

- Winner: Good Design Award 2020
- Winner: Energy Efficient Product of the Year 2019

World First Achievements:

 Contract won for world's largest order for Evaporative coolers, following 3 year tender process. Seeley International supplied 50,000 Breezair rooftop coolers to the Tent City in Mina Valley, Saudi Arabia, where summer temperatures can easily exceed 45°C.

Breezair benefits include:

- Patented Hushpower® direct drive InvertaCool® motor
- Patented ultra quiet centrifugal or axial fan configuration

The coolest, quietest and most energy efficient evaporative air conditioner range in the world!¹

YEAR ANT

This warranty has terms and conditions, including the requirement for regular servicing of the product in accordance with the owner's manual.

AUSTRALIAN DESIGNED, MAD AND OWNED

Breezair range

Extraordinaire®

The Breezair Extraordinaire® has redefined the **future** for whole-of-home cooling.

- Available at selected Seeley International Dealers.
- Architecturally designed, with a sleek, single piece outer cover.
- Patented axial SuperStealth® fan delivers whisper guiet operation.
- Super-efficient InvertaCool® motor.
- Hugging every roof line, from 10 to 40 degrees.
- Comes with external air sensor, that displays current outside
- Breakthrough Black Magic® MINI-CELL7 CHILLCEL® pad technology provides cutting edge cooling capacity and aesthetics.
- Intuitively optimises water and energy usage based on outside ambient conditions.

Never settle for ordinary!

Available colours8

Enjoy superior cooling with Breezair Supercool®

This premium range has extra thick Chillcel pads, producing up to 13% more cooling when compared to the Icon range

- Exclusive to Climate Masters of Seeley International Dealers
- Comes with external air sensor, that displays current outside
- Intuitively optimises water and energy usage based on outside ambient conditions.

Icon®

The Breezair Icon® range is a proven high performer, cooling your whole home and saving you huge dollars on energy costs.

Available colours⁸

Harness the elegance of Breezair Extraordinaire, as it graces your roof! The coolest ever evaporative air conditioner.

Breezair

Highly durable and

corrode or rust.

non-corrodible outer casing

• High performance Permatuf®

polymer construction will not

Features and benefits

Power control module helps save water and power

- · Advanced electronics ensure maximum efficiency.
- Microprocessor constantly analyses water quality, water consumption and power output.
- Incredibly smart, exceptionally reliable and super-durable.

Drain and clean function

 Auto-cleanse[™] - Automatic water draining when the system is not in use avoids algae growth.

Only available with selected MaglQtouch controller models. Regular maintenance (typically every 2 years for domestic use) is still required.

Breakthrough Black Magic® MINI-CELL^ CHILLCEL® pad technology

- The only evaporative cooling medium of its kind. Fully manufactured in Australia to address the harsh Australian climate. It's an **absolute out-performer!**
- Exclusive small cell design provides cutting-edge high capacity cooling.
- Maintains our global leading Mini-Cell⁷ Chillcel[®] pad technology, which increases surface area of the **fully wetted pads** by 25%, dramatically increasing cooling capacity and efficiency - **BEYOND BELIEF!**
- Black Magic® MINI-CELL⁷ CHILLCEL® pads deliver superlative cooling and transformational aesthetics to your home, enabling the unit to blend seamlessly into its surroundings.

Icon® series fan is ultra-quiet

- Designed to deliver optimum air output at all times.
- Ultra-quiet centrifugal fan with 10 speeds.
- Use "Fan Only" mode (no water) to blow fresh air through the home and expel odours.

Hushpower® direct drive InvertaCool® motor uses less energy

- Exclusive to Breezair and manufactured in Australia.
- Incredibly quiet and efficient throughout itoperating range.
- Unsurpassed reliability.
- Corrosion proofed throughout with parts that won't rust.

Weather Seal® reduces draughts and dust

- Automatic sealing system.
- · Reduces need for winter cover.

Tornado® pump that won't block

- Australian designed and manufactured.
- Exceptional reliability in extreme conditions.
- Dual directional it can't block!

Watermiser® saves water

- Uses the minimum amount of water to achieve maximum high efficiency cooling.
- Water quality monitoring to maximise water savings.
- Leak detection when the unit is in use.

Bushfire Protection Firewall Ember Screen (optional extra)

• Helps guard against ember attack in bushfires.

Turn to page 30 for more information.

Exceptional water distribution, <u>increases</u> <u>cooling effect</u>

 Unique to Breezair, this Australian design ensures constant, even pad saturation increasing the cooling effect and outperforming competitor products.

Braemar range

Evolution

With its low profile, superb design, the Braemar Evolution unobtrusively sits below the roof ridgeline to blend seamlessly with your home.

- InvertaCool® motor, using far less energy than a standard motor.
- Superstealth® axial fan.
- Ultra quiet.
- 24% more active chillcell cooling pad area than the Paradigm™.
- The Lowest Profile Range of high-performers!

Available colours8

SuperStealth® Invertair® Series

The world's first high performance inverter axial evaporative air conditioner with the highest cooling capacity and energy efficiency in the Braemar range.

- Ultra-quiet cooling.
- Outstanding high-performance cooling.
- Patented ultra quiet SuperStealth® fan (quieter than the standard stealth fan).

Available colours8

Paradigm SeriesTM

Proven performer

- Braemar quality and reliability.
- High efficiency and cooling performance.
- Premium water management system.

Available colours8

16 I

Harness the brilliance of Braemar Evolution! Braemar The coolest, compact, low profile air conditioner in the world

I 17

Evolution

AUSTRALIAN DESIGNED, MADE <u>AND OWNED</u>!

Features and benefits

Exceptional water distribution -

The water distribution system includes a combination of pressurised and free-flowing water systems, providing:

- Even water flow over the sides of the top pannel, ensures maximum pad area and maximum cooling at all times.
- Australian designed, world patented, free flow, water distributor ensures constant, even pad saturation increasing the cooling capacity and outperforming competitor products.

Breakthrough Black Magic[®] MINI-CELL⁷ CHILLCEL[®] pad technology

- The only evaporative cooling medium of its kind. Fully manufactured in Australia to address the harsh Australian climate. It's an absolute out-performer!
- Exclusive small cell design provides cuttingedge, high capacity cooling in a class of its own.
- Maintains our global leading Mini-Cell⁷ Chillcel[®] pad technology, which increases surface area of the fully wetted pads by 25%, dramatically increasing cooling capacity and efficiency BEYOND BELIEF!
- Black Magic® MINI-CELL⁷ CHILLCEL® pads deliver superlative cooling and transformational aesthetics to your home, enabling the unit to blend seamlessly into its surroundings.

Power control module helps save water and power ---

• Microprocessor constantly analyses water quality, water consumption and power output.

Tornado® pump that won't block ---

- Australian designed and manufactured.
- Exceptional reliability in extreme conditions.
- Dual directional it can't block!

Auto Cleanse[™] · Auto water draining keeps your system clean

Braemar

- Empties the reservoir automatically when system is not in use, leaving it clean and dry.
- Ensures the system always operates at maximum efficiency, while using the minimum amount of water.
- Helps to reduce seasonal maintenance⁹ as required by some other brands.

UV stabilised and corrosion free

•The cabinet and water reservoir components are injection moulded structural foam polypropylene (Permatuf®) and are UV stabilised and non-corrodible.

SuperStealth® Technology (Evolution & SuperStealth® models)

- Advanced aerodynamic design.
- •SuperStealth® InvertaCool® motor and SuperStealth® fan for high energy efficiency and whisper quiet operation.

- Uses the minimum amount of water to achieve high efficiency cooling.
- Water quality monitoring to maximise water savings.
- Keeps your system clean on the inside.

AutoWinterseal® reduces draughts and dust

- Automatically closes off the air conditioning ducts when not in use.
- Reduces winter chills entering your home.
- Ensures comfort all year round.

Bushfire Protection Firewall Ember Screen (optional extra)

• Helps guard against ember attack in bushfires.

Turn to **page 30** for more information.

^{7.} Patent pending, 9. Seasonal maintenance does not replace regular maintenance of the unit as required for peak performance.

Harness the polyer of coolair by SEELEY INTERNATIONAL M

Affordable, effective cooling

Accessible evaporative air conditioning

The Coolair Brand became part of the Seeley International suite in 1997 and was quickly redeveloped to incorporate the all-plastic, corrosion-free construction which Seeley had pioneered.

The brand maintains its ethos of affordable effective cooling; presenting a good, value for money unit for those wanting to enjoy the benefits of evaporative cooling, without the cost of more advanced features.

Unit Snapshot:

- Variable speed motor
- Axial fan
- Automatic drain valve optional

Coolair range

CPQ Series

Coolair Evaporative air conditioners are very affordable, representing the CHEAPEST-HIGHEST-VALUE-FOR-MONEY coolers, which do not compromise on the renowned Seeley performance.

- Variable speed motor.
- State of the art axial fan.
- Contains a bleed valve for water management, suitable for harsh water quality regions.
- Proven track record for reliability and longevity.

Available colours8

Coolair... Australia's greatest value for money home cooling!

Durability ensures long term trouble-free comfort!

Efficiency, save up to 75% on energy costs².

Australian designed, made and owned!

Natural fresh, cool, clean, filtered air.

NATA accredited test results substantiate superior product performance.

Alfresco living with options for security vents so doors and windows can remain closed.

2. Seeley International's calculation based on approximate running cost figures from publicly sourced data. Comparison with 1.5 star not zoned ducted refrigerative system in a large size (220m²) 2-star pre 2005 house in a Melbourne climate, cooling all day on the weekend and in the mornings and evenings when internal temperatures are high, and an electricity tariff of 31.9c/kWh. Negligible water cost excluded. 8. Colours may vary, Terracotta made to order.

Coolair

Features and benefits

AutoWinterseal® reduces draughts and dust

• Ensures comfort all year round.

Exceptional water distribution increases cooling effect

Coolair's unique patented water distribution system means no clogging of the filter pads.

- Clever high efficiency pad wetting system.
- Total pad saturation for total cooling.
- High performance cooling day and night.

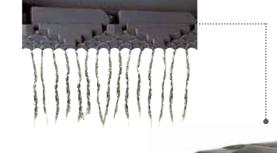

Tornado® pump that won't block

- Australian designed and manufactured.
- Built to outlast other less efficient conventional style pumps.
- Dual directional it can't block!

Stealth® fan is whisper quiet

- Advanced aerodynamic design.
- Super quiet in operation.
- Produces more beautifully cool, quiet, refreshing breeze, and at a **fraction** of the running costs of alternatives!

- Visually discreet, low profile.
- Integrates unobtrusively with the roof line.
- High performance Permatuf® polymer construction.
- Highly durable, will not corrode or rust.
- Available in a range of contemporary colours.

- Reduces the amount of seasonal maintenance with this optional feature¹⁰.
- This clever device conserves water by retaining the system's water for up to 72 hours of non-operation.

Flexible control with MagIQcool®

The Coolair MaglQcool® controller is incredibly easy to use.

- •Set your preferred temperature level on the clever wall mounted control and Coolair will do the rest - quickly, cleanly and reliably.
- Maintain your desired comfort level with four convenient modes to choose from - cool, vent, auto and timer.

The only evaporative cooling medium of its kind. Fully manufactured in Australia to address the harsh Australian climate. It's an absolute out-performer!

- Exclusive small cell design provides cutting-edge high capacity cooling.
- Maintains our global leading Mini-Cell⁷ Chillcel[®] pad technology, which increases surface area of the **fully wetted pads** by 25%, dramatically increasing cooling capacity and efficiency - BEYOND BELIEF!

How do I choose?

The airflow, and size of the area you wish to cool, will be the largest determinants of which model is best suited to your needs. Whilst it may seem that bigger can only be better, a correctly sized air conditioner for your home will run far more efficiently, which equates to maximised electricity cost savings.

- •Is your home well insulated? This is a key consideration, as it impacts your home's ability to maintain its temperature. A well insulated home may need a lower capacity unit, in comparison to a poorly insulated home.
- What climate will your home operate in? The hotter the climate, the greater the demand on your air conditioning.
- •What additional benefits are important to you? Seeley International evaporative air conditioners offer additional technology benifits like winter seals, SuperStealth® fans, inverter motors, water savers, and architecturally designed units for greater aesthetic appeal.

^{11.}Airflow performances at 80Pa - the equivalent duct static pressure of typical ducted residential multiple outlet installations.

The above data was drawn from Meridian Test Laboratory's test analysis. The testing was performed by a NATA accredited laboratory to the requirements of the Australian standard AS2913-2000 "Evaporative Air Conditioning Equipment." Achievable with ambient 38 °C DB, 21 °C WB, room temperature 27.4 °C.

Harness the **Simplicity** of **MAGI@TOUCH** controller

Touch screen technology

Smart, sophisticated and incredibly intuitive, your MaglQtouch® controller makes operating your evaporative air conditioner a breeze. Control the temperature, fan speed and many more features on a user friendly touch screen. The discreet and modern design will blend seamlessly into the décor of your home.

Main Features

Program mode

Manual mode

Programmable 7 day, 4 time period program, customisable to suit your lifestyle (including a temporary over-ride function).

Manually control temperature and/or fan speed settings, at will.

Cooling & Heating

Control both your cooling and heating from one MaglQtouch® controller.

Energy saving quiet night mode

A comfortable nights sleep that won't cost the

for even greater economy at lower noise levels.

automatically reduces fan speed during the night

earth. The energy saving quiet night mode

Auto-clean™ Function

World's first fully automated pad cleansing capability enables you to set and forget, ensuring your cooling pads remain clean, fresh and functional all summer long, season after season12.

Useful settings

Access additional features such as child lock, and servicing information.

Optional Extra: Magigtouch® Air Sensor

The MaglQtouch® Air Sensor monitors temperature and humidity levels. It allows you to mount your MaglQtouch® controller in the most convenient place in your home, as the MaglQtouch® Air Sensor will then take over temperature control from the MaglQtouch® controller. This can then be located in the best place in the house to ensure ultimate cooling comfort for everyone.

Harness the **power** of wifi and wireless

Controller upgrade options

Wireless:

- Battery operated Wireless Controller using Radio Frequency technology.
- Ideal for renovations, or where access for cabling is limited.
- Easier to install, the RF option also provides up to 2 master controllers.
- Can control the entire system from 2 locations, rather than 1; an ideal solution for larger, or two storey homes.

Wifi Enabled16:

- Take complete control of your comfort at home, at all times.
- Upgrade to a WI-FI module to work with your wired-in MagIQtouch® Controller, 17 enabling you to control your heating directly from your personal device through our smart app.

21°C +

- The Smart app is available on Android and IOS devices.
- Integrate into voice activated smart home controls like Google Home and Amazon Alexa.

16.Requires MaglQtouch® WI-FI kit, compatible MaglQtouch® controller and MaglQtouch® account to operate. Additional costs may apply. 17. MaglQtouch® WI-FI Module is not compatible with MaglQtouch Wireless Controller. Existing installations including a MaglQtouch® controller may need to be upgraded if purchasing the WI-FI module. Additional costs may apply.

Wi-Fi Smart app¹³

Control your cooling comfort needs directly from your mobile device! For example, turn on your cooler wherever you are, ensuring you come home to a cool home on those hot summer days. The smart app is free and available for download on your smartphone.

Smart home integration¹³

Control temperature and fan speeds with your voice through Amazon¹⁴ Alexa or Google Assistant¹⁵ technologies.

Voice commands are easy and simple to use, like "Alexa, turn on my Cooler" or "Hey Google, set the Cooler to 21 degrees".

Google Home

works with the Google Assistant

Additional Information

Combined heating and cooling solution

A Seeley International Ducted Gas Heater will complement your Evaporative cooling system:

- •Warm and cosy in winter; fresh and cool in summer!
- MaglQtouch® controller will seamlessly control both heater and cooler systems.
- Braemar has the highest efficiency star ratings in Australia for ducted gas heating¹⁸.

Keep your home secure

Did you know you can cool your home without leaving your doors and windows open?

Cost effective and easy to install, the **Security Relief Vent**™ allows you to run your evaporative air conditioner while you are out, with all your windows and doors safely closed and locked.

Your home will **stay** cool, because the **cool** exhaust air is released into the hot roof space, cooling everything while you're out.

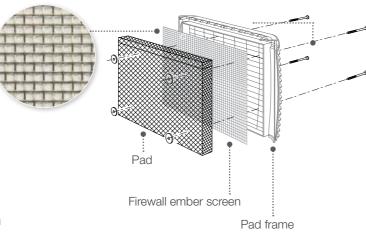

When you return home, if you wish, simply open up your windows and doors as normal - either way, you will maintain the delivery of fresh, cool air throughout your home.

Bushfire protection

Firewall Ember Screen (optional extra)

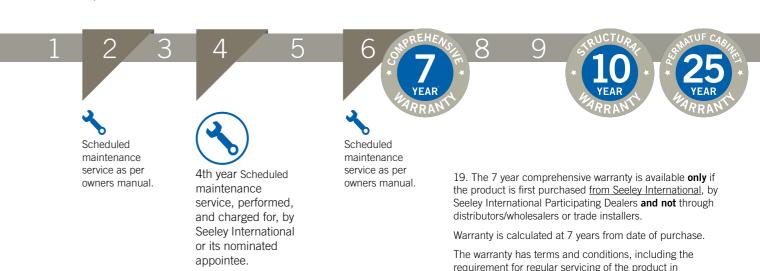

- Helps guard against ember attack in bushfires.
- Made from non-combustible mesh
- Maximum aperture of 2mm.
- Can be fitted to existing cooler pad frames.
- Minimal reduction in air flow of around 5%.
- To meet BAL ratings, the cooler also requires a Firewall Auto Seal installed.
- Fitting both Ember Screen and Auto Seal to comply with BAL ratings will reduce airflow by up to 15%.

Warranty Terms

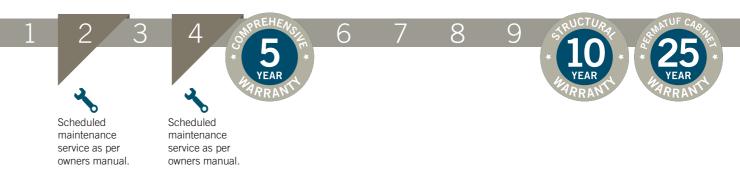

7 Year Warranty - Breezair & Braemar
